

## Midwest Consulting Group

Midwest Consulting Group was founded in 1994 with the idea of helping Companies and Employees grow. Let us help you in your search for the right job.

Are you looking for more? Want to be part of an elite organization where learning and teaching are the norm. Our client is an organization like that.

They are currently looking for top talent to develop C# .NET Multithreaded Enterprise applications that are scalable and efficient. If you are passionate about developing and are driven to be the best this may be the place for you.

### Responsibilities

The Senior Software Engineer leads technical design, develops code and mentors junior engineers to enhance our application framework across the presentation layer, business logic layer, and data access layer. Develop automated unit tests to verify code is working properly, perform code reviews and deliver scalable systems.

### Required Skills

Have worked on application frameworks across the presentation layer, business logic layer, and data access layers

- Experience building Enterprise.NET Web applications using C# / ASP.NET
- ASP.NET AJAX, Silverlight, WCF (Windows Communication Foundation), WF (Windows Workflow), LINQ, Web services, ASP.NET Web forms
- Knowledge in Object Oriented Analysis and Design
- Excellent communication skills, both written and verbal
- Works well independently and as part of a team
- Bachelor's degree from accredited college in related discipline

### Highly Desirable Skills

- Deep JavaScript and AJAX skills
- Experience writing ASP.NET C# controls
- Experience using Telerik Rad Controls for ASP.NET AJAX
- Working knowledge of Visual Studio 2008 and Team Foundation Server
