Job Title: Application Support Analyst —Dallas, TX

Summary: Support and maintain Enterprise Upstream Oil and Gas application systems. **The client is looking for a candidate with a background in the Land module and Revenue accounting module. Experience with the Production side of Natural Gas is a must.**

Essential Duties and Responsibilities

- Provide support and maintenance for Upstream Oil and Gas Solutions
- Perform user application setup and security analysis by user and function
- Understand key business functions and supporting software systems and interfaces
- Provide troubleshooting solutions for software bugs, data inconsistencies and user errors
- Liaise with network administrators, systems analysts, programmers, and others to optimize or to resolve defects in existing applications or processes
- Assist in design and creation of custom reports and queries based on user specifications
- Provide user training for creating custom and ad-hoc reports and queries
- Work in a team environment to analyze, evaluate, document and recommend solutions
- Help coordinate testing and installation of software enhancements, updates and upgrades
- Cultivate and disseminate knowledge of application support best practices
- Work with Business groups and other members of the IS/IT team to provide demonstrations, advice, and guidance in the effective use of software

Computer and Applications Skills

Required

- Proficient with Microsoft® Office
- Good understanding of accounting and quantitative analysis
- Proficient writing queries and stored procedures on SQL Server 2000/2005
- **Two years or more** experience with general accounting software (general ledger, accounts receivable, accounts payable)
- **Enertia Enterprise Upstream Oil and Gas Solutions (land and revenue accounting modules)**
- **Natural Gas Accounting experience**
